SCAFFOLDING

The people and expertise to provide you with safe access methods and protection across the board

WE INSTALL THE FOLLOWING TYPES OF SCAFFOLDING:

► **MULTIFUNCTIONAL**

► **SUSPENDED**

► **CONVENTIONAL**

► **IN CONFINED SPACES**

► **TUBE & CLIP**

► **FACADE**

ACCESS ENGINEERING:

- Complete studies (schematic layout and calculation note by our internal engineering department, and installation diagrams taking account of site conditions).
- Training for all employees: scaffolders and assistants to a minimum of professional certificate level
- Training for employees operating in specific areas (confined spaces, SCBA, "HOB0" electrical safety certificate)
- Assembly, removal and all modifications on industrial sites (maintenance or major shutdown) or other sectors of activity (construction, shipyards, events, etc.)
- Delivery acceptance of access material by qualified personnel - scaffolders or Tagman - responsible for the safety of all involved
- Compliance with all protocols recommended by the French Association of Scaffolding, Formwork and Shoring (CFECE), and professional and HSE standards

INDUSTRIAL PAINTWORK

The people and expertise to provide your industrial coatings

OUR CORE BUSINESS:

- ▶ **ANTICORROSION TREATMENT OF ALL STRUCTURES**
- ▶ **MECHANICAL STRIPPING BY SAND OR ULTRA-HIGH PRESSURE (UHP) BLASTING**
- ▶ **PEENING**
- ▶ **MANUAL OR AIRLESS APPLICATION**
- ▶ **INDUSTRIAL CLEANING**
- ▶ **SPECIAL AND SPECIFIC COATINGS**
(floor resins, equipment stratification, etc.)

But also, **containment using heat-shrink tarpaulin in addition to scaffolding** (EPC INDUSTRIEL) and rope access (ASAP NC)

ACCESS ENGINEERING:

- ▶ Complete studies according to the technical specifications of environmental constraints while also taking into account the guarantees provided
- ▶ Staff training: ACQPA, FROSIO employee certification
- ▶ Staff training for working in specific areas (confined spaces, SCBA, "H0B0" electrical safety certificate, etc.)
- ▶ Strict protocol and quality monitoring during operations.
- ▶ Internal and external checks as requested.
- ▶ Containment for sensitive operations (installation of heat-shrink tarpaulins and filtration systems, etc.).

ACQPA / FROSIO / OHGPI / GEPI : Our work is subject to the approval of these organisations which provides a guarantee of our rigorous standards.

ETNA/EPC are members of GEPI and OHGPI, French organisations applying an established code according to rigorous technical criteria for paint application and guarantees.

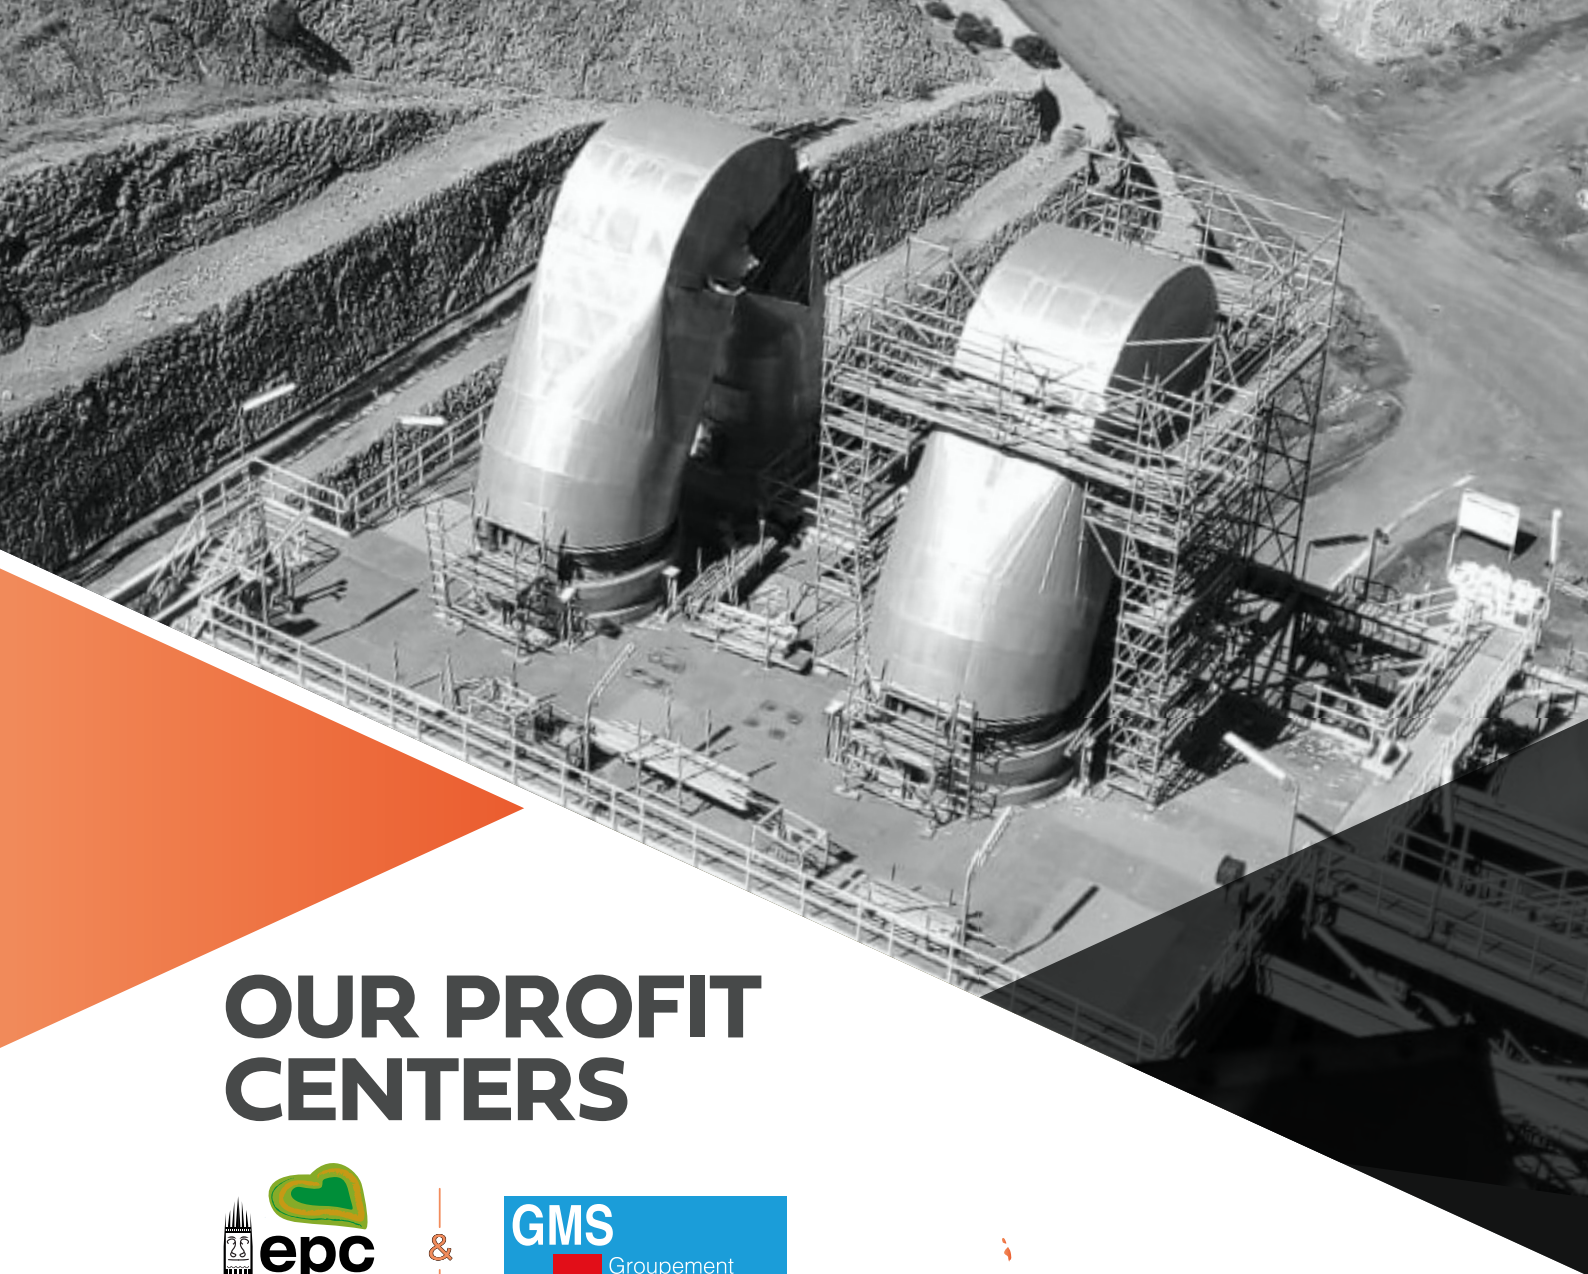

WORK AT HEIGHT AND DIFFICULT ACCESS

Operating in the field of rope access work, our company is particularly specialised in industrial maintenance work (inspections, mechanical maintenance, confined spaces, etc.). ASAP NC has been part of the EPC Group since 2021.

WE REALISE ROPE ACCESS WORKS

- ▶ More than an objective, safety is our business. We operate in strict compliance with the applicable professional standards and regulations.
- ▶ Certification of technical personnel: professional certificate for rope access technicians or IRATA.
 - ▶ Employee training for work in specific areas (confined spaces, SCBA, "H0B0" electrical safety certificate, etc.).
 - ▶ Strict protocol and quality monitoring during operations.
 - ▶ Internal and external checks as requested.

&

EPC MAINTENANCE NORD

Scaffolding and industrial painting maintenance contract

GMS | GROUPEMENT MAINTENANCE SUD

Maintenance contract for scaffolding and industrial painting

At the North and South mining sites, **we have developed partnerships with local entities and customary authorities** to train and build on the sustainable skills of New Caledonian youth in our specific trades.

Working together, **EPC INDUSTRIEL, ETNA and ASAP NC** contribute the full breadth of their skills, resources, experience and expertise for maintenance contracts.

Jean-Pierre and Fabrice JEANDIN
Founding Managers

EPC is a family-owned group that has been built on four complementary criteria:

QUALITY • HEALTH • SAFETY • ENVIRONMENT

For 30 years, this approach has won the loyalty of our customers and enabled us to develop our businesses by constantly adapting to the specific needs of mining sites and ensuring our compliance with international standards, **while favouring locally sourced employees to protect the local job market going forward.**

- ▶ **Protect of the health and safety of all employees thanks to the daily commitment** of management and supervisors.
- ▶ **Train all our employees and partners** to boost their capabilities and skills throughout their careers.
- ▶ Involve everyone in **applying the most recent technologies** and systematic quality control.
- ▶ Compliance with the regulations of international standards that meet the strictest criteria.
