

**Jean-Pierre and Fabrice JEANDIN**  
Founding Managers

EPC Group is a family-owned company.

In **1989**, Jean-Pierre JEANDIN created the company EPC, which will become the leader in new building painting and renovation work until 2020.

At the same time, SOPRA has specialized since 1994 in renovation and finishing work to meet the growing demand for buildings maintenance and rehabilitation.

In **2004**, during the nickel plant construction in the north of the island, Fabrice JEANDIN (Jean Pierre son's), started the industrial branch of the group. Since the end of construction, with the technical knowledge acquired, EPC Industrial has become the major company for maintenance and shutdown management in the industrial sector, with up to 300+ local workers per site.

In **2010** EPC Group acquire ETNA, a leader in Corrosion protection and industrial painting since 1995. This acquisition allowed EPC Group to extend its range of services in the mining, oil and gas and industrial maintenance domains.

In **2022**, ASAP, the main contractor for Rope Access activities in the industry, joined EPC group.

In **2024**, Having become a leader in its fields of expertise, EPC Group decided to enlarge his activities to the Pacific and set up subsidiaries in French Polynesia and Papua New Guinea.

The expansion objective is to highlight the groups model of local populations development and training with a strong involving in its environment.

# GROUP PRESENTATION

EPC GROUP IS A SERVICES CONTRACTOR, A SPECIALIST IN ACCESS SOLUTIONS AND CORROSION PROTECTION.

We operate in industry (mining, oil and gas), civil engineering and new build construction.

EPC Group offers a large range of services:

- PROJECT AND SHUTDOWN MANAGEMENT
- INDUSTRIAL MAINTENANCE
- BUILDING AND ENGINEERING STRUCTURE MAINTENANCE
- CONSTRUCTION

## Experience

- **SCAFFOLDING:** More than 20 years on industrial sites (construction, maintenance, projects and shutdowns).
- **INDUSTRIAL AND BUILDING COATING:** 33 years in anticorrosion application and building painting.
- **ROPE ACCES:** 10 years on industrial sites (maintenance, projects and shutdowns)

## OUR VALUES

### KNOW-HOW

#### Training and local LABOUR involvement

EPC Group development is based on local recruitment and training, and a strong involvement in the environment.

All our employees are trained to the EPC Group and international standards.

### CARE

#### QHSE and CSR commitment: EPC Group priority

With our strong QHSE and CSR policies, we offer high-level services based on our Health and Safety program.

QHSE have always been the foundations of EPC GROUP development. The EPC VIE initiative, based on the continuous improvement of our activities, aims to transform our practices to achieve the highest level of operational excellence.

The EPC VIE approach reinforces our commitment to safety, integrating autonomous and robust managerial practices in all our activities.

Since the adoption of EPC VIE, our safety results have improved significantly, demonstrating our commitment to sustainability and well-being for all.

## OUR SUBSIDIARIES IN PACIFIC

### PAPUA NEW GUINEA

A partner for your maintenance, shutdown, and industrial site construction solutions (mining, oil and gas).

### NEW CALEDONIA

4 local branches

### FRENCH POLYNESIA

One company for all our services

# SCAFFOLDING

OUR SCAFFOLDING EXPERTISE OFFERS TO OUR CUSTOMERS SECURE ACCESS SOLUTIONS TO ACHIEVE THEIR REQUIREMENTS IN COLLECTIVE'S PROTECTION.

WE PROVIDE  
ALL TYPES OF  
SCAFFOLDING  
ACCESS:

► TUBES AND FITTING

► MULTIDIRECTIONAL

► SUSPENDED

► CONFINED SPACE

► MOBILE ELEVATED

► WORK PLATFORMS

► BUILDING

OUR STRENGTH: THE ACCESS SOLUTIONS TECHNICAL ENGINEERING

- Complete Engineering (Drawing, calculation notes and erection instructions according client specifications)
- Technical Training for manual labour, scaffolders, foremen, project managers to international standards
- Safety training for high risk working areas (confined spaces, ATEX zones,...)
- Our team erect and dismantle any design in the most efficient and safe manner in major environment (Industry, Construction, shipyards,...)
- Access conformity certified by qualified inspection team
- All our access solutions are erect in compliance with international standards
- Confinement solutions with heat-shrinkable tarpaulin to create safe working atmosphere (climate, atmosphere controlled)

SCAFFOLDING  
MANAGEMENT

**+2500**

EXPERIENCE

**15**  
YEARS  
on industrial sites

# ROPE ACCESS

WORK AT HEIGHT AND DIFFICULT ACCESSSES

We are specialized in providing Rope Access solutions where access is difficult due to the environment or in exposed areas and when this form of access solution offers more efficiencies (cost, planning,).

**INDUSTRY:** we offer a large range of work tasks (Surface preparation and treatment, Insulation and PFP application, NDT inspection, Maintenance, repair, modification, replacement and decommissioning of a variety of assets/structures).

**BUILDING:** we support our customer in all building work tasks (Inspection, Maintenance, Repair, Equipment installation, Securing, Facade restoration, ...)

**Safety is our commitment; we strictly operate safely and efficiently according to IRATA international standard.**

EXPÉRIENCE

**10**

YEARS

on industrial sites

# INDUSTRIAL PAINT

EXPERT IN HIGH-QUALITY CORROSION PROTECTION FIELD.

## OUR EXPERTISE:

- ▶ All corrosion protection Fields.
- ▶ All surface preparation methods (dry & wet blasting, UHP, vacuum blasting, soft blasting, robotised solutions...)
- ▶ Grinding
- ▶ Cleaning
- ▶ Manual or airless application
- ▶ Floor resin
- ▶ All type of specific protective coating (waterproofing, linings & repairs, TSA)
- ▶ Fireproofing

## QUALITY:

- ▶ We provide full design solutions according to client or international standards.
- ▶ Member of OHGPI (French Office for the Approval of Industrial Paint Guarantees), we guarantee a high-quality level whatever the environment.
- ▶ Team training: Certified ACQPA, FROSIO, NACE
- ▶ Safety training for high risk work areas (confined spaces, ATEX zones,)
- ▶ Strong quality control system during all application phases

TRAINING
